

FEATURES

- Steel and brass laminated top plate.
- Fully extended poles- minimum loss of working area.
- Standard Allen Key for easy use.
- Extremely low profile for wheel area.
- Made with super powerful NdFeB new generation magnets.
- Extension plate is suitable for clamping directly by 3 jaw chuck.
- Unique design of the chuck minimizes the deflection of top plate when switched ON/OFF, resulting in better job accuracy.

Product Code : NR All dimensions are in mm.

PART NO	DIA (OD)	POLE PIT CH	H
10	100	2 (1.5+0.5)	45
13	130		
16	160		
20	200		
25	250		
30	300		
35	350		
40	400	48	
45	450		
50	500		

Due to continuous upgradation in design there could be changes in specification. Other sizes on request. Before ordering, contact Lifton Magnets or your nearest dealer to confirm the suitability of this model for your application.

APPLICATIONS

- Ideal for cylindrical or rotatory grinding.
- Enables the grinding of thin objects and small objects that has hitherto been difficult.

- Attached to rotary grinders for operation
- Back plate with tapped hole can be made on request.

FEATURES

- Steel and brass laminated top plate.
- Poles individually magnetized.
- Double magnet system for maximum power.
- Magnetic force will not weaken with long use.
- Low magnetic field- no magnetization of tools.
- Simple and smooth actuating mechanism.
- Rugged construction: exceptional longevity.

Product Code : FR All dimensions are in mm.

APPLICATIONS

- Adaptable to wide range of work pieces.
- Ideal for many tool room applications.
- Provides powerful holding power for thinner work pieces as well as for thicker work pieces.
- Powerful and suitable for grinding and turning operations.

- Back plate with tapped hole can be made on request.
